Short backstory

Yukiri Yamagiri grew up on the bustling Sixth Street of New Eridu, where he lived with his middle-class family and his beloved younger twin brothers, Kazukiri (和霧) and Kozukiri (光霧). At 16, Yukiri was their protector and confidant, guiding them through the challenges of their environment.

One fateful day, when Kazukiri and Kozukiri were just 7 years old, a devastating accident occurred. In a moment of selflessness, Yukiri intervened to save his brothers from a catastrophic event. His bravery came at a tremendous cost: the accident left 47% of his body destroyed, including his left eye, both arms from the elbows to his hands, both legs from the knees down, and most of his internal organs. The trauma also robbed him of his emotions, a heavy toll for his heroism.

Despite his severe injuries, Yukiri's determination remained unbroken. He underwent extensive cybernetic reconstruction, and his appearance forever reflects his 16-year-old self. Driven by his desire to protect others and inspired by his experience, he trained rigorously to join the Search and Rescue Hollow Investigation organization. His dedication paid off when he earned a place in Squad 4.

Now, at 25, Yukiri continues to work tirelessly in Squad 4, striving to safeguard others from the dangers of the Hollows. His brothers, now older and deeply influenced by Yukiri's example, are also training to join the Search and Rescue Hollow Investigation organization, following in his courageous footsteps.

Weapon

Yukiri's weapons have two sleek, cyberpunk-styled axes, each featuring a futuristic and angular design. The axes are connected by a long, durable chain that links them together at the knobs of their handles, allowing for fluid, dynamic attacks and versatile combat maneuvers. The blades of the axes are forged with a high-tech alloy, reflecting a glossy white with neon accents of cyan and yellow, which pulse with an inner light that hints at their hidden capabilities.

Each axe is equipped with a concealed mechanism built into the handles, featuring switches that, when triggered, activate a unique freezing function. This releases a dense, chilling mist from canisters stored in the butts of the blades. The mist is an advanced cryogenic compound that envelops the immediate area in a frosty haze, capable of freezing surfaces, slowing enemies, or creating ice formations for strategic use.

The chain adds an extra layer of versatility, allowing Yukiri to swing the axes in wide arcs, pull enemies in, or use the chain for grappling and movement. Thus, the battlefield becomes a playground of creative combat possibilities.

The weapon's color scheme combines stark white with vibrant accents of cyan and yellow, making it visually striking and symbolic of a futuristic, high-energy combat style.

To keep the chains untangled and prevent tripping over them, Yukiri uses this modified backpack attached to his armor to store his chains, with both axes having different chains.

Yukiri also stores his cryogenic gas in this modified backpack and can release it from the backpack itself.

Despite Yukiri's backpack storing his chains and the cryogenic gas, he has enough space to store snacks, first aid kits, and essentials.

I will include a few graphs with my detailed design ideas for the boots, gloves, and anything else I deem necessary in Yukiri's folder.
In the graph, if it says "Glowing", it means that the aspect it's a part of either emits light or is reflective if it isn't made of metal, the decision is up to the designer.
Despite looking like normal sports shoes in the Main Appearance and Exclusive Skin designs, Yukiri's shoes are hiking boots.
Yukiri's boots are steel-toe.
Yukiri's boots and gloves look similar to the reference image but Yukiri's boots and gloves have a more simplistic and cyberpunkish aesthetic.
Yukiri wears gloves to protect his prosthetic hands from damage and scratches from the chains.
<p>The reason why Yukiri wears mostly light blues and light colors are for 2 reasons:</p> <ol style="list-style-type: none">1. It helps Yukiri be seen in the dark or vibrant areas in the hollow2. It helps Yukiri camouflage in the cryogenic while in combat
Yukiri wears cargo shorts and a short-sleeve high-neck hoodie because it allows him to move unrestricted for rescuing and combat since he needs to be agile and flexible. Another reason is that pants and long-sleeved clothing could get in the way of his prosthetic limbs.
<p>The acronym "<i>S.H.R.I.S</i>" on Yukiri's outfit stands for:</p> <p>"Search and Rescue Hollow Investigation Squad"</p>
Image 2 on the gloves is his squad logo.
The metal piece above the knuckle guard on Yukiri's gloves has either the Ice Attribute logo or the Japanese characters of his code name engraved in it.
On the shoulder pads of his armor are built-in flashlights and emergency lights, like those that police and paramedics use.
Yukiri's prosthetic limbs, backpack, and armor follow the same color palette as his mask.
